How to Unblock Minecraft Now!

Updated: Oct 13, 2021

Getting Minecraft unblocked is simple!

Have you noticed that specific applications and games are blocked on your computer? Are you in another country, at work, or at school with your favorite game blocked? With a free game blocked? With Minecraft blocked?

Games are more challenging and fun when played with friends. That's why many gamers want Minecraft unblocked on secured networks with limited access to the internet. Unfortunately, online authentication is required before a game can run—you need an internet connection.

Why? Why? Why?

Many Wi-Fi networks are restricted by a variety of institutions and workplaces. Even countries restrict access to the internet. Here are some issues Minecraft players encounter requiring them to get games unblocked:

- Unable to download Minecraft
- Unable to access Minecraft.net
- Unable to connect to online servers

Here is What to do:

The easiest and quickest solution is to use a VPN—Virtual Private Network. These applications are handy tools to get Minecraft unblocked, along with being able to unblock free games, or unblock Minecraft.

How your games unblocked, step-by-step:

So, how do you choose and set up a VPN to get Minecraft unblocked or unblock free games in general?

First, you must choose a secure VPN with numerous servers that works quickly with minimal lag time.

We suggest Hotspot VPN. This service provides ultra-fast VPN, unlimited browsing and streaming, reliable safety and anonymity in public Wi-Fi, a dependable method to unblock all content, and a 30-day money-back guarantee.

Once you've chosen a VPN to unblock Minecraft, here's what to do:

1. Download your chosen VPN and complete factory installation instructions.
2. Once installed, create an account or login to an existing one.
3. Find and connect to a new server, preferably one closer to you, for optimum speed.
4. Then access your unblock games, such as Minecraft!

Keep in Mind

Be aware that you may be unable to install your VPN on a PC at work or school. VPNs require admin rights to access your local network drivers. That means no access to a VPN via a USB stick, run on portable mode. Instead, you'll have to install your VPN on the actual PC.
